

Answers for Ireland Siemens Limited Ireland Company Profile

Siemens is a global company providing products, systems, services and solutions for the industry, energy and healthcare sectors.

Our innovations answer the world's toughest questions: from how to deliver efficient energy supply without negatively impacting the environment, to providing industry with solutions that increase productivity and competitiveness, or enabling early detection and effective treatment of disease.

For the Energy Sector, we offer products and solutions for the generation, transmission and distribution of electrical energy, as well as solutions for the oil and gas industry. In Healthcare we deliver innovative products and complete solutions as well as service and consulting for the healthcare industry. Our Industry Sector provides products and solutions in the fields of production, transportation and building systems.

Active in Ireland for over eighty years, Siemens has been involved in many key infrastructure projects, commencing with the Shannon hydroelectric power scheme in 1926. Major projects have included the construction of many of Ireland's power plants, large scale transportation solutions and the introduction of the most up to date medical imaging systems to Ireland's hospitals. The company employs over 1000 highly skilled people in Ireland.

The Ireland of tomorrow will be shaped in large measure by the megatrends of urbanisation and demographic change and ensuring adequate supplies of energy, water and other everyday necessities while guaranteeing mobility, security, communications, healthcare, industrial production and environmental protection will be major challenges.
